Are **You** Ready to Get Started?

Join the Floor Covering Apprenticeship Program

Are you at a point in your life where you feel you need to start looking to the future? Maybe college isn't for you, but you aren't willing to settle for whatever job comes along. The Floor Covering Apprenticeship Program allows you to "earn while you learn" and gain the training and skills you need to be a valuable construction trades craftsman.

Why Be A Floor Covering Craftsman?

First, the floor covering trade pays well, provides health care benefits, retirement benefits and continuing education. Second, it's not just a job, it's a career. Once a skill is mastered it can become a lifetime asset allowing you the flexibility to work at a variety of job sites and in a variety of geographic locations.

Will I Like It?

You can take pride in your skills. The work of a floor covering professional is often in the public spotlight. Whether you laid the floor covering in a hospital, home, office building or sports arena, thousands of people see your craftsmanship on a daily basis. A quality floor covering job, creates a quality environment. After the job is finished, the floor covering is a daily reminder of the importance of your work.

How Much Do I Earn As An Apprentice?

A floor covering apprentice starts at 60% of Journey-level wage. With every 1,000 hours successfully completed on the job, apprentices get a raise in hourly wages. Craftspeople who have completed an approved Apprenticeship and Training program are more in demand by employers. Also, apprentice program graduates generally earn more during their working years than those who did not learn their skills in a formal program.

What Does It Take to Complete the Program?

The program combines paid, on-the-job work with classroom instruction. It takes approximately four years to complete the apprenticeship program. To reach Journey-level status a floor covering apprentice must complete 576 classroom hours and 6,500 to 8,000 on-the-job hours. Safety and health are of paramount concern. There is zero tolerance for unacceptable behavior and compromised installations.

What Will I Learn?

With the complexity of environmentally friendly materials and installation products the floor covering industry has grown tremendously. Floor covering installation is a highly skilled art. It requires accuracy, keen judgment and mathematical skills. The installer must be able to analyze and think in terms of color combinations, patterns and measurements.

When Do I Go To Class?

Classes are held every other Saturday during the school year, September through June.

Do I Have A Job During My Apprenticeship?

You will have job opportunities with the union contractors during your apprenticeship. Most employers will require a driver's license and pre-employment drug test and background check.

Do I Qualify?

You must be 17 years or older and have a high school diploma or GED equivalent. You must submit a copy of your high school diploma or GED certificate. Women, minorities, and military veterans are encouraged to apply. The program qualifies for VA Educational Assistance. Direct entry into the program is available for military veterans with Honorable Discharge and DD214 within the past 24 months. Graduates of approved Job Corp and other approved Pre-Apprentice Programs may also apply for direct entry.

How Do I Apply?

You must first fill out and submit your application in person. Members of the Joint Apprenticeship and Training Committee (JATC) then interview qualified applicants.
